

My Role Model: Elon Musk

Elon Musk inspires me. He is one of the richest people in the world. His net worth is \$21.8 million. He is known for a successful car brand called, Tesla. It is the most economic car in the world. He inspires me because of many reasons. Elon Musk motivates me to work hard and that anything can be possible if you put effort into something. He is affecting the choices I make because he helps me think bigger. Sometimes I feel like something is highly unlikely to happen and that makes me not want to try something because of that. Elon took a risk of starting his own car company and not knowing if it will be successful or not. That is what's most important.
